

25-10-2017

Antonio Luis Climent Albaladejo

Ha participado en el siguiente curso de la Universidad Politécnica de Madrid:

Software-Defined Radio 101 with RTL-SDR

This MOOC is an introduction to Software-Defined Radio (SDR) technologies. We will work with the very popular RTL-SDR hardware, which is a low-cost SDR receiver, prototyping-friendly (like the Raspberry Pi and Arduinos). Moreover, this MOOC is also a good introduction to digital signal processing, radio frequency and communications electronics.

Duración del curso: 4 semanas (14 horas de estudio estimadas)
